DETAILED ACTION

Status of Claims

Claims 1-17 and 19-99 are currently pending. Claims 2-16 and 96-98 were previously withdrawn. Claim 18 is canceled. Claims 1, 17, 19-95 and 99 were previously rejected.

Pursuant to the Pre-brief Appeal conference decision on March 15, 2010, the previous rejections under 35 USC 103 mailed on August 5, 2009 have been withdrawn and reasons for allowance after an Examiner's amendment are detailed below.

The previous rejection under obviousness-type double patenting over copending application No. 10/784,909 is withdrawn since this "provisional" nonstatutory obviousness-type double patenting (ODP) rejection is the only rejection remaining. Thus, since the instant application is the earlier filed of the two pending applications, the rejection is being withdrawn to permit the earlier-filed application to issue as a patent without a terminal disclaimer.

Claims 96-98 are being rejoined and thus following the Examiner's amendment, claims 1, 17 and 19-99 are allowable.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided

Art Unit: 1627

by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jennifer Gupta on April 16, 2010.

The application has been amended as follows:

(1) CANCEL claims 2-16

(2) In Claim 96 line 7 after "dimethicone copolyols"

Insert:

" , wherein the at least one other surfactant chosen from dimethicone copolyols is present in an amount ranging from 5% to 10% by weight, relative to the total weight of the emulsion"

(3) In Claim 97 line 7 after "dimethicone copolyols"

Insert:

" , wherein the at least one other surfactant chosen from dimethicone copolyols is present in an amount ranging from 5% to 10% by weight, relative to the total weight of the emulsion"

(4) In Claim 98 line 3 after "dimethicone copolyols"

Insert:

“, wherein the at least one other surfactant chosen from dimethicone copolyols is present in an amount ranging from 5% to 10% by weight, relative to the total weight of the emulsion,”

(5) In Claim 99 line 6 after “dimethicone copolyols”

Insert:

“, wherein the at least one other surfactant chosen from dimethicone copolyols is present in an amount ranging from 5% to 10% by weight, relative to the total weight of the emulsion”

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Claims 1, 17 and 19-99 of the instant application claim a water-in-oil emulsion (W/O) comprising a fatty phase, an aqueous phase, at least one surfactant chosen from C₈-C₂₂ alkyl dimethicone copolyols, and at least one other dimethicone copolyol (5% to 10%), a hydrophobic coated pigment, at least one volatile hydrocarbon oil, and at least one volatile oil.

The closest prior art reference is Hanna et al. (U.S. Patent No. 5,843,417). Hanna et al. teach a cosmetic water-in-oil emulsion useful as a liquid foundation. The difference between the emulsion of Hanna et al. and the instant emulsion is that the instant emulsion specifically contains at least one surfactant chosen from C₈-C₂₂ alkyl dimethicone copolyols and at least one other surfactant chosen from dimethicone

Art Unit: 1627

copolyols in an amount ranging from 5% to 10%. Hanna et al. teach that the emulsion preferably contains one or more surfactants wherein examples of suitable oil surfactants include dimethicone copolyol, laurylmethicone copolyol, glyceryl stearate, beeswax, cetyl dimethicone copolyol, polyglyceryl-4-isostearate and hexyl laurate and mixtures thereof and the amount of oil surfactant(s) is from 5-15%.

Hanna et al. teach that mixtures of oil surfactants (e.g. dimethicone copolyol and cetyl dimethicone copolyol) can be combined in an amount of between 5 and 15 wt. % thus dimethicone copolyol and cetyl dimethicone copolyol can be added up to 15 wt. % which could be 5% dimethicone copolyol and 5% cetyl dimethicone copolyol, etc. However, Applicants have provided a declaration showing unexpected and superior results for their claimed composition as compared to the composition disclosed in Hanna et al. Specifically, the Applicants have shown that compositions that have between 5% and 10% of dimethicone copolyol have significantly higher viscosity and stability and better homogeneity than similar emulsions having dimethicone copolyol outside said range. Thus, although the prior art renders obvious any amount of dimethicone copolyol from 5-15%, the prior art does not recognize that by specifically using 5-10% of dimethicone copolyol, superior results are achieved.

Thus claims 1, 17, and 19-99 are non-obvious and free of the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusions

Claims 1, 17 and 19-99 are allowed. Claims 2-16 and 18 are canceled.
